

Downloading Printer Driver Update

Please note to unplug printer from computer to do this procedure

1. Goto www.apedistribution.com.au For The Stores
2. Choose Downloads

Download from Website

Step 1. Choose Windows

Step 2 – Choose Discontinued

Click Next

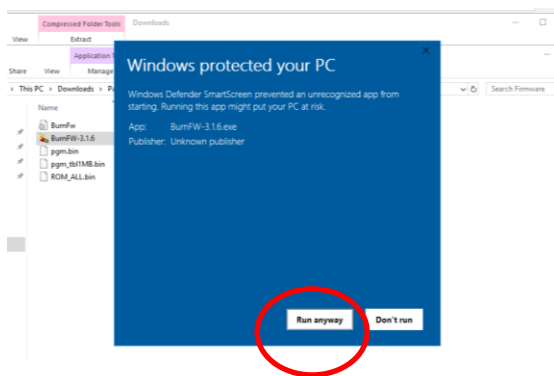

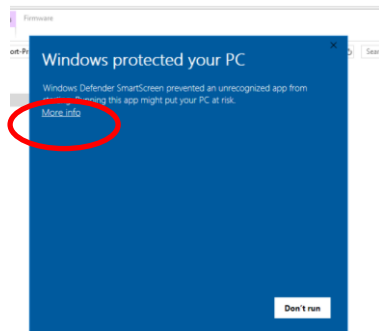

Scroll down to

Asia Pacific & Others	Windows	S420 Driver_v3.1.0.23_FW_AP_v1.29	16,323 M	
-----------------------------	---------	-----------------------------------	-------------	---

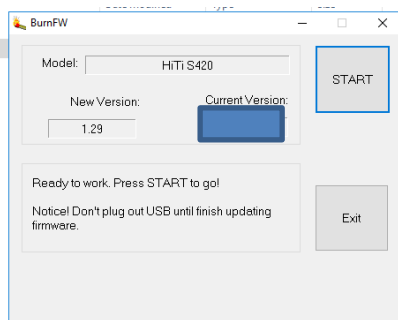

GO

3. Once firmware is downloaded .
4. Open folder
5. Rightclick on zip folder
6. Extract all

7. Open firmware folder
8. Choose burn FW
9. You might get a blue window open up otherwise follow step 14
10. Choose **more info**

12. Connect printer cable to back of printer and into usb computer port
13. Switch on Printer
14. Then Click start and wait for printer to reset its self about 5min

Once printer has reset itself the current version should read the same version as the New version which is Ver 1.29.
